1-AB-2006 Gold Dust Lot Split

Ms. Galav stated that this was a GLO patent easement abandonment. She inquired whether there would be any specific information the Commission would like presented related to the case.

Commissioner Schwartz commented that the Commission would appreciate seeing the entire area including a three or four mile swath in order to depict how the area connects to other areas. Included should be information about adjacent easements and possible effects of connectivity. He noted that most questions concerning abandonments relate to connectivity and future use; if provided with more information, less discussion would be required.

9-AB-2006 132nd Street and Rio Verde

Ms. Galav stated that staff would be sure that context, connectivity, and the relationship of the abandonment to the road would be shown.

5. **ADJOURNMENT**

With no further business to discuss, the study session adjourned at 4:11 p.m.
